Dear Nick

### **Testimonial**

I am writing to express my thanks to you and your team, especially Mark Hughes, for his orthodontic work on my son Robert.

In common with many teenagers, he had braces fitted to his top and bottom jaws. About a year later, we noticed that his teeth had started to move again. I initially asked Nick for a second opinion concerning the orthodontic work previously undertaken.

From the review undertaken, it was clear that Robert's treatment had ended too quickly, as although his teeth had straightened, his mouth was continuing to grow in his late teenage years.

A series of new retainers were made for Robert which he has worn for the last year. Although, we can see the benefit that these retainers have brought, his treatment still has a while to go as his mouth continues to grow.

The excellent quality of the work undertaken at Woodborough House has shown me that a second opinion from a suitably qualified professional cannot go amiss.

I would not hesitate to recommend Woodborough House to anyone requiring general or specialist dental treatment.

Yours sincerely

Gordon Welsby
